

# EMBELLISH WITH GLITTER!

Tools you will need to embellish a glass item with glitter :

DAP RapidFuse Adhesive Brush Applicator  
Glass item  
Painter's tape  
glitter

## INSTRUCTIONS

1. Wrap painter's tape around areas of the glass item where you do not want glitter. Since we decided to add glitter to the bottom of this glass jar, we placed tape about 2" from the bottom.
2. Since RapidFuse sets quickly, we worked on one side of the glass jar at a time. Using the RapidFuse Brush applicator, apply generous amounts of RapidFuse to the side of the jar, overlapping the tape a bit, and making sure that the entire surface is covered in glue.
3. Over a paper towel, sprinkle the glitter over the glued surface until it is completely covered.
4. Work your way around all four sides of the jar until complete. Let it sit until the RapidFuse sets completely.

TIP: If you worked over a paper towel, you can now fold your paper towel in half and carefully pour the unused glitter back into the container!
